4th NATIONAL CONFERENCE OF NEONATAL ANESTHESIA SOCIETY

Theme: Neuro-Spine procedures in the Newborn and Neonates: Challenges for the Anesthesiologist

Pre-Conference Workshops: 30th & 31st August, 2025

 nassociety8@gmail.com

Welcome Note

As Anesthesiologists caring for newborns and neonates, we are entrusted with immense responsibility of ensuring safety and well-being of our most vulnerable patients, who pose unique challenges due to their rapidly changing physiology, limited reserves, immature and evolving drug handling, and unique comorbidities. The profound impact that our expertise has on each neonate's journey in life, cannot be overemphasized. Neonatal Anesthesia Society (NAS) was established envisaging imparting knowledge on basic and important aspects of neonatal anesthesia, sharing experiences to enhance patient care and optimizing their clinical outcomes.

The initial activities of NAS were on virtual platform due to prevailing COVID -19, as CME in 2021, and two National conference in 2022 and 2023. In 2023, nearly 175 delegates attended the conference, while 150 delegates attended the workshops, conducted at seven different centres in the country.

With abating COVID menace, we ventured into the challenges of physical mode of meeting which culminated as successful 3rd National Conference 'NASCON 2024' held at New Delhi, with 110 delegates, and same number attending various workshops at 5 centres in the country.

The organizing committee is delighted to invite you to NASCON 2025, to be held on 6th - 7th September 2025, at All India Institute of Medical Sciences (AIIMS) Nagpur. Each conference is theme based, a tradition to reflect the rich diversity of our discipline and a structured coverage of various aspects of neonatal anesthesia. Following the themes of previous conferences The Airway (2022), Cardiovascular and pulmonary systems (2023), Anesthesia Challenges in Neonatal Gastrointestinal, Hepatobiliary and Renal surgeries (2024), the theme for NASCON 2025 is '**Neuro- Spine Surgical procedures in the Newborn and Neonates: Challenges for the anesthetist**'.

This one and a half day of academic extravaganza shall provide an unique opportunity for professionals to participate in thought-provoking discussions, interactive sessions, in-depth dialogues on the latest research, emerging technologies, and best practices in neonates undergoing various neuro-spine surgical procedures. The Scientific Sessions will involve distinguished speakers and experts sharing their insights and experiences through plenary talks, panel discussion, Pro-Con debates, "How I do it" Video sessions, Case Based Learning Discussions, Advances and Future trends in Neonatal Anesthesia, and Pre-conference workshops. Delegates will be able to showcase their competitive instincts through the Quiz competition. Participants will also have the platform to present their clinical and research work through Free Paper and Poster Presentations. The conference will also exhibit a vendor exposition to display the latest technology and products related to Neonatal Anesthesia.

As this Annual Meeting contemplates to serve as a forum to explore latest evidence-based practices and cutting edge innovations of neonatal anesthesia, our commitment to being updated and educated in this critical and delicate field will empower us to provide safest and most effective care possible of our tiniest patients in their most difficult times.

Despite escalating costs each year, organizers have decided not to increase the delegation and workshop registration fees, to encourage the dedicated learner. Life memberships and Registration for the conference and workshops are now open, and we encourage you to take advantage of early bird rates (**upto 30th April 2025**).

We are ecstatic to host you in the City of Oranges and Tigers!

Thank you,

Organizing Committee NAS

Long live NAS!!
